I'm starting the 7-Day DevOps challenge!

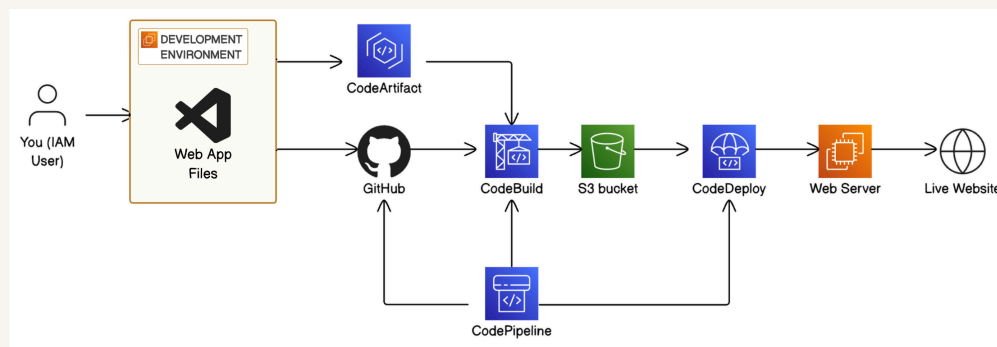

Shravan Kumar Satapathy

I'm building a CI/CD pipeline in 7 days

In this DevOps challenge, I'm learning about building a complete CI/CD pipeline. By the end of the 7 days, I will have built a CI/CD pipeline using AWS, automated app deployment, and created portfolio documentation.

Hold me accountable!

I will set aside 2 hours every day for a week to work on this challenge. I will keep myself accountable by daily logging my progress. My reward for completing this DevOps challenge will be celebrating my new practical skills and portfolio.

What is DevOps?

DevOps is a set of practices combining development and operations for faster, reliable software delivery. DevOps engineers implement this by building automated pipelines, containerizing apps, and turning infrastructure into code.

What is CI/CD?

CI/CD stands for Continuous Integration and Continuous Delivery. This process helps teams by automating code changes to live apps for efficient, reliable software development and deployment.

Excited to share my progress - do this challenge with me!
